- 3. Canine (Cuspid): 17-23 months
- 4. First Molar: 14-18 months
- 5. Second Molar: 23-31 months
Oh, Mama, I have so much to set up before Mariana’s first birthday party today. Presents, party favors, piñata, cake.

Dental visit? What does that have to do with little Mariana’s birthday?

Every baby should have their first dental visit when their first tooth appears or by their first birthday. I learned about it on SmileCalifornia.org.

Plus, we have Mariana’s first dental visit today!

Thanks, Dr. Anand. We’ll see you in a few months for our son Oscar’s molar sealants.

Surprise! Everything for the party is set-up and we are ready for all of the guests!

Of course! Anything for my babies! How was the dentist?

Mom! I can’t believe you did all this!

Great! We got in and out of there in no time. And with Medi-Cal Dental, the visit was free!

It’s true! It’s part of our Medi-Cal dental coverage!

A free dental visit? I never thought I’d hear that in the same sentence!

Good to know! We have Medi-Cal too, and this little guy is almost a year. I’m going to schedule his appointment very soon.

Excellent! But try not to schedule it on the same day as his big party—Trust me!

You and Mario take her to the dentist, I’ll prep the rest of the party.

This won’t hurt her, will it?

Wow! That was easier than I thought!

Not at all, just a quick look-see here... aaaaand we are done!

Yep! The first visit is just a simple check-up. Here is a teeth development chart to keep track as her teeth come in.
