

Transcript “Seal Today to Prevent Decay” video – English (YouTube)

<https://www.youtube.com/watch?v=AXF7Anxkou4>

Duration: 1 minute, 45 seconds

Speaker: Mom- Oh, hello again! Well, today’s dentist day.

Speaker: Mom- Nothing urgent, though.

Speaker: Mom- Just a routine six-month check-up for her, molar sealants for this little guy and a chance for me to check one thing off my to-do list.

Speaker: Mom- Plus, thanks to our Medi-Cal dental benefit - by the end of our appointment, we’ll be in, out, and scheduled for our next six-month check-up - at little or no cost to us. Which makes using our Medi-Cal dental benefit a budget-friendly and family-friendly experience.

Speaker: Mom- That’s Jean, she’s the dental hygienist.

Speaker: Mom- Today, she and the dentist are going to give my oldest a routine check-up. Which usually starts with an easy cleaning to remove any plaque or tartar.

Speaker: Mom- Next, they might do some x-rays to spot early signs of cavities. Then they’ll finish up with a little polish and a good flossing, you know, just for good measure.

Speaker: Mom- Oh, there goes my little guy getting his molar sealants!

Speaker: Mom- Not to be confused with fluoride treatments, of course.

Speaker: Mom- Molar sealants are just a painless clear coating put on permanent molars to help keep ‘em protected from harmful bacteria and cavities.

Speaker: Mom- It takes a matter of minutes... and lasts for several years. And, thanks to Medi-Cal, my kids will all have them.

Speaker: Mom- Once the dentist lets those molar sealants settle on his teeth for a bit, both my kids will be good to go back to school! And I can get a few more things checked off this to-do list before dinner.

On Screen: [Seal Today to Prevent Decay. Learn more about molar sealants at SmileCalifornia.org]

Speaker: Mom- Until next time, find out why a healthy mouth includes molar sealants by visiting SmileCalifornia.org.

End.
